

4:cwnn

cWnn - A Chinese Input System Running on Unix Workstations.

Contents [1 DESCRIPTION](#) [2 COMMANDS AVAILABLE IN MAN FILE](#) [3 UTILITIES AVAILABLE IN MAN FILE](#) [4 MISCELLANEOUS INFORMATION](#) [5 CATEGORY](#)

DESCRIPTION

cWnn provides a wide range of input methods, satisfying the needs of Chinese users all over the world, including P.R.China and Taiwan.

Besides, it is capable of converting an arbitrary sequence of Pinyin/Zhuyin into the expected Hanzi and caters for error tolerance in the four tones.

cWnn has standardized Pinyin and Zhuyin and it provides an ideal input environment for all users.

COMMANDS AVAILABLE IN MAN FILE
